INFECTION CONTROL SUMMIT

AUGUST 17, 2016

A MUST ATTEND PROGRAM!

8:30 am – 9:30 am

**Infection Prevention and Control – How Do We Operationalize All the Changes?**

Now that you have heard about all of the changes and expectations, this program will provide insight on strategies for implementation! This engaging presentation will provide all participants with tips for clinical process needs and leadership strategies for successful outcomes. The information and strategies provided will help you assess if your current system is up-to-date on best practices and quality expectations. We want to describe the clinical processes affected by the industry updates, verbalize 3 leadership strategies for successful implementation of the new information needed to be included in the Infection Prevention and Control Program and describe follow up and oversight necessary for program compliance.

**OBJECTIVES**

- Describe the clinical processes affected by the industry updates.
- Verbalize 3 leadership strategies for successful implementation of the new information.
- Describe follow-up and oversight necessary for program compliance.

**PRESENTER**  
**Susan LaGrange, RN, BSN, NHA, CDONA, CIMT**  
*Director of Education*  
 Pathway Health  
 White Bear Lake, MN  
 Susan.lagrange@pathwayhealth.com

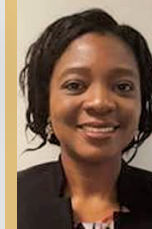

9:45 am – 11:45 am

**Importance of Infection Prevention in Long Term Care Settings**

This presentation provides an overview of the changing population in long-term care settings and an introduction to the problem of healthcare-associated infections (HAIs) in long term care settings. In addition, Dr. Ogundimu provides examples of HAIs in these settings and outlines the Department of Health and Human Services National Action Plan to Eliminate HAIs and current progress made on the implementation of the Action Plan. She also provides examples of national and state efforts (specifically the CDC Infection Control Assessment tool) to provide resources and support for infection surveillance and prevention activities in long term care settings. She highlights the elements of the proposed CMS regulatory requirements for nursing home infection prevention and control programs. Lastly, she reviews key activities which can be included during an assessment of a facility's infection prevention and control program.

**OBJECTIVES**

- Describe the changing population of older adults receiving long-term care services and their risk of infection.
- Cite examples of reports which have raised awareness in long-term care settings.
- Review the proposed CMS regulatory requirements for nursing home infection prevention and control programs.
- Review the major domains and key activities which might be included during an assessment of a facility's infection prevention program.
- Review the strategies for incorporating infection safety into a facility's infection prevention program.

**PRESENTER**  
**Dr. Abimbola Ogundimu, DrPH, MPH, BSN, CIC, CPHQ**  
*Certified Infection Preventionist*  
 Centers for Disease Control and Prevention (CDC)  
 Division of Healthcare Quality Promotion (DHQP)  
 Prevention and Response Branch  
 MS: A-31, 1600 Clifton Road NW, Atlanta, GA 30333  
 BZO2@cdc.gov

11:45 am – 12:45 am

**Lunch**

# INFECTION CONTROL SUMMIT

- This Educational offering has been reviewed by the National Continuing Education Review Service (NCERS) of the National Association of Long Term Care Administrator Boards (NAB) and approved for 5.50 clock hours and 5.50 participant hours. Approval # 20170816-5.50-TKVZ-IN

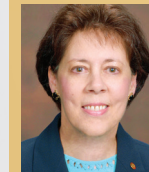

12:45 pm – 1:45 pm

**Evaluating Infection Prevention Programs in LTC Facilities: Public Health Support to Strengthen Skills/Build Knowledge**

This program will be a discussion about the Public Health Infection Prevention Program assessment services in which we do an onsite visit to the LTC facility (that is skilled nursing facilities) and interview the infection preventionist using CDC assessment tools. This is not regulatory and they do not share results with anyone, including DQA. It's beneficial to the facility in that it identifies gaps in their infection prevention programs and can help prepare them for state surveys.

**OBJECTIVES**

- Describe the Wisconsin Division of Public Health LTC Infection Prevention Assessment activities.
- Review the LTC Infection Prevention Program Assessment Tool.
- Provide information regarding how to obtain an on-site assessment visit.

**PRESENTER**  
**Gwen Borlaug, CIC, MPH**  
*Coordinator, HAI Prevention Program*  
 Wisconsin Division of Public Health  
 1 Wilson Street, Room 272, Madison, WI 53702  
 Gwen.Borlaug@dhs.wisconsin.gov

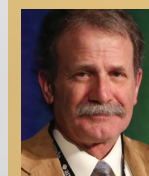

2:00 pm – 3:30 pm

**Antibiotic Stewardship: "Start Counting"**

This presentation is for facilities which may be starting from scratch or struggling with a nascent program which is having trouble getting off the ground. It's based on the theme that if you can't count or measure something, you can't improve it.

**OBJECTIVES**

- Know why antibiotic stewardship is important.
- Be able to identify information flow from change of condition through treatment orders to resolution of symptoms.
- Know how to create a system to capture data points in a chaotic and hectic environment.
- Learn to save and analyze data to improve management of infectious disease.
- Know the importance of feedback to physicians and staff.

**PRESENTER**  
**Dr. Joe Boero**  
*Medical Director*  
 Park Manor Nursing Home  
 250 Lawrence Avenue, Park Falls, WI 54552
